

## Keck PRC Passive Skimmer

The Keck PRC is a passive skimmer with a floating intake that separates and recovers light hydrocarbons from groundwater. The Keck PRC collects floating product down to a sheen then is emptied through a discharge valve at the bottom of the canister after being raised to the surface.

### FEATURES

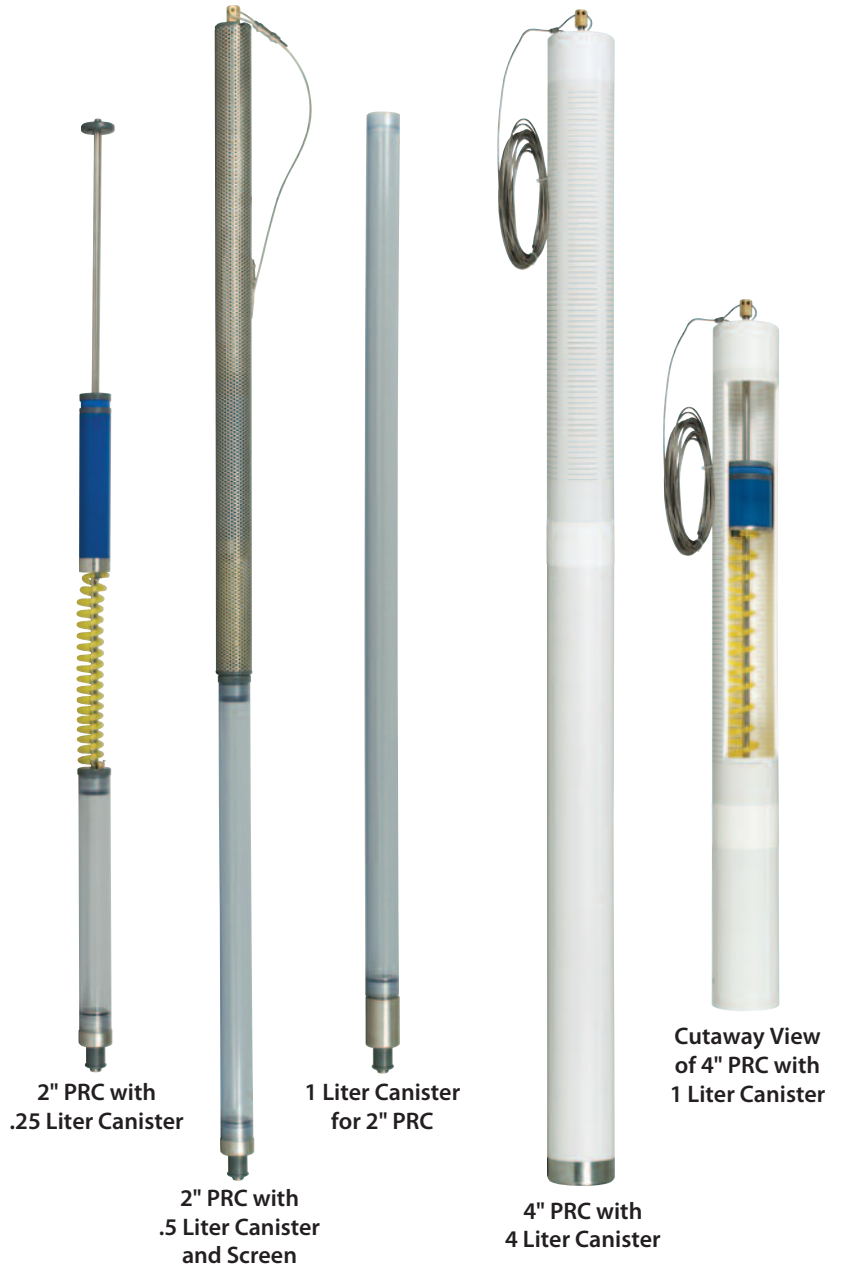

- Oleophilic/Hydrophobic filter buoy recovers product without taking in water
- Quick fill time – about 15 minutes with ample product
- Protected easy release drain valve
- Able to convert to active recovery systems

### 2" PRC

- 12" effective buoy travel
- 3 recovery capacities: .25, .5 and 1 liter
- Transparent recovery canister
- 2" or larger monitoring well applications
- Optional protective screen

### 4" PRC

- 16" effective buoy travel
- 3 recovery capacities: 1, 3 and 4 liter
- 4" or larger monitoring well applications
- Buoy protected in 0.020 (.5mm) slot PVC screen
