**PROMESH
RESPIRATORY
GEAR**

Durable, Comfortable, Shape Retentive

ProChoice provides a range of leading respiratory solutions to suit the needs of all workplaces.

The premium range of ProMesh Moulded Masks features a flexible netting which ensures optimum shape retention of the mask and a secure seal during long periods of wear.

When selecting a respirator mask consider the following:

The type of environment and contaminant that will be encountered.

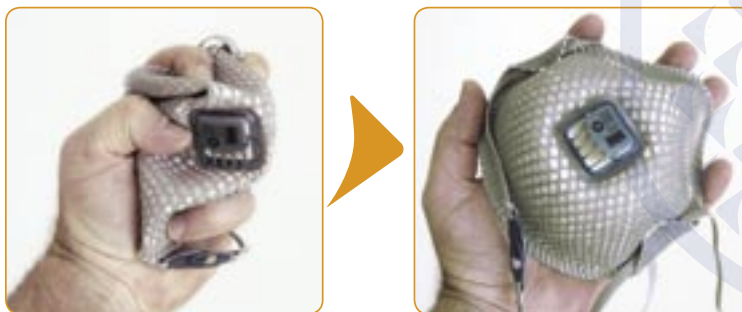

Read the information on the packaging, and consult the accompanying chart. Some masks are suitable for protection from dust particles but will not offer protection from the inhalation of harmful fumes.

A fume results from the intense heating of solids. As the heated vapour condenses, a fine dust is formed and may be harmful when inhaled. Choose the recommended type of mask for this application.

When do you need to change your mask?

Disposable masks are designed to last for a shift, however the effectiveness of the mask may be diminished in certain conditions. It is suggested that when a work break is taken, disposable masks be replaced.

If a mask becomes soggy, loses its seal or becomes difficult to breathe through it must be changed. The ProMesh range reduces these problems.

Optimum Shape Retention

- P1** - Protection against mechanically generated particles.
- P2** - Protection against mechanically and thermally generated particles.
- P2 + Charcoal Filter** - Protects against nuisance-level-organic vapours.

New to the extensive ProChoice Range

PROMESH RESPIRATORY GEAR

ProMesh Premium Range of Disposable Respirators

Designed to provide individuals with a range of quality moulded masks which offer high levels of performance at an affordable price.

- ProMesh - Ergonomically designed to provide the perfect fit for optimum comfort and airtight seal.
- Safety flexible netting retains shape and reduces breathing resistance.
- All ProMesh Models feature QuickLock straps for easy fit and release.
- Inner mask is lined with soft velveteen for extreme comfort during extended wear.
- **ProMesh P2 Carbon Filter Valved Welding Mask Now Available. PC823**

P2 Respirator PC821
For protection against mechanically and thermally generated fine dust, Fibres and Mists.
Qty/box - 12
Qty/carton - 20 boxes

P2 Respirator + Valve PC822
For protection against mechanically and thermally generated fine dust, Fibres and Mists with valve include for extra air flow.
Qty/box - 12
Qty/carton - 20 boxes

P2 Respirator with Valve and Active Carbon Filter PC823
Protects against nuisance-level organic vapours.
Qty/box - 12
Qty/carton - 20 boxes

RESPIRATORY GEAR

ProChoice has an extensive range of disposable respirators to suit different environments.

Non Toxic Dust Mask PC101
